TOOLS THAT SUPPORT YOUR ANATOMY & PHYSIOLOGY COURSES

A&P Applications Manual

This manual contains extensive discussions on clinical topics and disorders, helps students apply the concepts of anatomy & physiology to daily life, and is especially valuable for students who are planning careers in the health professions.

Study Cards

These Study Cards are six-panel laminated cards showing all body systems and their organs and functions.

Study Guides

These study guides include a variety of exercises and review activities, which address different learning styles and call on students to develop their critical-thinking abilities.

Coloring Workbooks

The coloring workbooks are excellent tools for anyone who needs to learn basic human anatomy & physiology. Learning is reinforced on many levels through visual and written exercises and activities.

NEW! Get Ready for A&P, Second Edition

This hands-on workbook and website get students up to speed with basic study skills, math skills, anatomical terminology, basic chemistry, cell biology, and other basics of the human body for their A&P course. Each topic area includes a pre-test, guided explanation, interactive quizzes and exercises, and end-of-chapter cumulative tests.

VangoNotes

This audio study guide helps students learn while they listen. For download to any computer or MP3 player, this audio program includes, for all chapters of the book, lectures on core concepts, audio "flashcards," and practice tests.

www.vangonotes.com

Practice Anatomy Lab (PAL™) 2.0 CD-ROM

PAL 2.0 is an indispensable virtual anatomy practice tool that gives students 24/7 access to the most widely used lab specimens, including the human cadaver, anatomical models, histology slides, cat, and fetal pig. Each of the five specimen modules includes hundreds of images as well as interactive tools.
