

15 Graph $Y_1 = 3$, $Y_2 = 5X - 17$, and $Y_3 = 15$ as shown in *Figure 15*. The graphs intersect at the points $(4, 3)$ and $(6.4, 15)$. The solutions to $Y_1 \leq Y_2 < Y_3$ are the x -values between these two points or $4 \leq x < 6.4$. It includes the value of $x = 4$.

$[-5, 15, 5]$ by $[-5, 20, 5]$
