

43 Table  $Y_1 = \sin(X)$  and  $Y_2 = -\sin(X)$  in degree mode starting at  $x = 0$ , incrementing by 180. See *Figure 43*.

$\sin x = -\sin x$  does not represent an identity. For example  $\sin 30^\circ = \frac{1}{2} \neq -\frac{1}{2} = \sin(-30^\circ)$ .

X	Y1	Y2
0	0	0
180	0	0
360	0	0
540	0	0
720	0	0
900	0	0
1080	0	0

Y1 = sin(X)
